-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims 1-20 and 30-54 have been considered but are moot in view of the new ground(s) of rejection.
2. Applicant's arguments, see Remarks, filed 7/30/04, with respect to the rejection(s) of claim(s) 1-20 and 30-37 under 35 U.S.C 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Cook et al. (5,916,585).

### ***Election/Restrictions***

3. Newly submitted claims 38-41 and 44-54 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Claims 38-41 are directed to different species from the invention originally claimed. Claims 44-54 are directed to a method for treating patients having an aneurysm using the stent-graft of the invention originally claimed. However the stent graft of the invention originally claimed can be used with a different method such as a method of delivering drug to a vessel other than an aneurysm.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 38-41 and 44-54 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-10, , 16-20, 30-37, 42 and 43 are rejected under 35 U.S.C. 102(e) as being anticipated by Cook et al. (5,916,585). Cook et al. disclose a stent graft coated with agents as claimed (col. 6, line 26 to col. 15, line 55).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-20 and 30-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pinchuck (5,628,788) in view of Cook et al. (5,916,585). Pinchuck discloses a stent graft. Although, Pinchuck does not disclose the stent-graft releasing an agent which induces the in vivo adhesion, as claimed, attention is directed to the Cook et al. reference which disclose agents as claimed for coating on the stent-graft

Art Unit: 3731

(col. 6, lines 26 to col. 15, line 55). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to coat the agents as claimed onto the stent graft of Pinchuck in order to enhance the adherence of the stent-graft and the blood vessel wall and prevent the migration of the stent-graft.
